## **BOOK SYNOPSIS**

This is the first complete economic and social history of Brazil in the modern period in any language. It provides a detailed analysis of the evolution of the Brazilian society and economy from the end of the empire in 1889 to the present day. The authors elucidate the basic trends that have defined modern Brazilian society and economy. In this period Brazil moved from being a mostly rural traditional agriculture society with only light industry and low levels of human capital to a modern literate and industrial nation. It has also transformed itself into one of the worlds most important agricultural exporters. How and why this occurred is explained in this important survey.
